

The BELFAKTO Brand Philosophy.

Founded in 1956 in Bitburg in the Eifel region of Germany, the joinery firm Notte can look back on a proud specialist history making custom-made products and interior fittings. It has created the new BELFAKTO furniture brand in response to the current demand for unique, high-quality, contemporary tables.

The very name of the brand alludes to the idea behind the concept: BELFAKTO reads like *bel facto* as in “beautifully made” and reflects the high standard of craftsmanship and design. The recumbent K in the logo both refers to the special shape of BELFAKTO table trestles and emphasizes the quality German origins of the company and its products. The corporate claim says it all:

“When passion takes shape”

The passion for wood and extraordinary design is reflected in each and every product. BELFAKTO tables stand out for their aesthetics, their appeal to the senses, and their functionality, not to mention the quality of the craftsmanship and finishing. The tables are superbly balanced in appearance, on a level that is as emotional as it is objective. The appeal at the emotional level derives from the aesthetics, the sensory qualities, and the choice of materials and finishes. Functionality, workmanship and an appropriate cost/benefit ratio are objective arguments to convince a customer.

A new take on tables.

The market launch in 2013 caused a real stir among journalists and in the trade. Tables and supplementary pieces of furniture now feature in design stores and exquisite villas all over the world. BELFAKTO stands for a unique collection of solid table frames made from local woods – offering an innovative take on the dining table, coffee table, work and conference table. The striking, in some case patented trestles can be combined with table tops in eight different shapes, ranging from the classic rectangle to asymmetrical forms.

BELFAKTO tables are truly high-end sculptures that are full of character, boast exceptional craftsmanship, and can be made to suit the client’s individual needs.

BELFAKTO has received many awards for its Design Quality and Brand Strategy: e.g. the **interior innovation award 2013** and **2015** bestowed by the German Design Council. Furthermore, the company was honoured with the **ICONIC AWARD : Interior Innovation 2017** and **2018**, with the **German Brand Award 2016** and the **German Design Award 2014, 2016, 2019**.

The BELFAKTO product descriptions.

TRIMUS

The upright one. This elegant dining and conference table boasts three harmonious elements – a base frame, struts and a tabletop. Triangular shapes and cross-sections lend TRIMUS its characteristic look, somehow reminiscent of a simple wallpapering table. The cross-strut not only stabilizes the table, it first and foremost makes a comfortable footrest. An angular, stylish appearance which fits in well with many different furnishing styles. The base frame can be painted any color to suit individual requirements. Quite simply a beautiful table, one which works even in extremely long lengths.

Honoured for its design quality at the German Design Council's competitions

„ICONIC AWARDS 2018 : INTERIOR INNOVATION“ and the German Design Award 2019.

BOWI

A well-balanced dinner. This design from the BELFAKTO manufactory is quite spectacular – and a fully functional dining table. Safe and stable, its wooden tabletop rests on two sweeping inverted arches made of anodized blue steel. Visually “off balance”, BOWI is in fact carefully balanced and even at its end can bear weights of more than 80 kg. What is more, it can be adapted to individual tastes as its steel base can be painted any shade. A table that is a true work of sculpture.

Honoured for its design quality at the German Design Council’s competitions

YAGO

The non-conformist. Straight lines are yesteryear. With its tilted and elaborately interlocking frames, this solid wood table really takes the stage. Imagine a couple holding hands dancing. Dynamic and yet refined lines, high-grade woods, and an array of different top shapes: the ideal basis for realizing the particular table requirements. As an elegant dining table or as an impressive conference table.

CHORUM

The magical one. A marvelous appearance, truly infused with motion. Like dancers, the arcs curve around the center. A spectacular solid wood structure catches the eye. Be it a round top, or the classic rectangular version, be it a wooden or a glass top, be it with one or two base frames – this table is a sculpture in its own right, exerting a magic fascination.

Honoured for its design quality at the German Design Council's competition

XENIA

Sculptural. A solitaire with a strong presence ideally suited as a dining table or a distinguished conference table which, with its pronounced horizontal thrust, still looks light and elegant in the longer versions. There are no bothersome table legs at the corners and a variety of table tops, including asymmetrical versions, create proximity and enhance communication.

The unique solid wood frames are made using traditional crafts techniques and are reminiscent of half-timbered and steel structures, solid, robust and yet definitely refined.

Winner of the German Design Council's "interior innovation award 2013" design competition.

Nominated for the German Design Award 2014.

XERXES

Powerful. An extraordinary trestle table, which given the numerous possible combinations of table top shapes and materials, can easily be customized to satisfy individual customer needs. The elaborate, complex solid wood intersecting structure draws attention to the frames and makes the table truly original.

Despite its robust appearance, the changing views through the trestles give the table a refined look at all times. A real eye-catcher also with a single frame.

info@belfakto.com _ www.belfakto.com

XAVER

Elegantly classic. A timeless piece, boasting the highest standards of craftsmanship and a patented solid wood intersecting frame. Based on a clear centre, it is coherent with even the larger sizes looking so light that they might be floating. Perfect with both a glass top or a top in wood, it can be used in a variety of ways, from a small coffee table to a large dining table.

info@belfakto.com _ www.belfakto.com

ROGUM

Archaic. A striking, highly expressive dining and conference table, which comes across as imposing and steadfast. The firm supports on which the impressive solid wood top rests resemble the stacked logs making up a campfire. Rogum offers ample space to guests and clients alike. It has an arresting appearance, exudes character, and is distinct enough to stand out.

info@belfakto.com _ www.belfakto.com

VITOX

Elegant. The striking frames make this solid wood table so unusual. Vitox is an invitation to dine and talk, offering as it does ample seating and leg space. Available in countless shapes it cuts a fine figure be it in the short or the longer version. The extraordinary intersecting frame strikes a balance between delicate elegance and sturdy strength.

VERA

Clear. With its classic trestle, this table harmonizes ideally with a wide variety of furnishing styles. A dining table either with a solid wood or an elegant, seemingly weightless glass top. Vera stands out specifically for this clear formal vocabulary. And it has a highly balanced and calm composition despite the fact that, depending on the angle, it repeatedly offers changing views through the trestles.

YORK

Formidable. Recalling an elegant sculpture this finely balanced table with its uncannily delicate construction is a pleasure for diners. York is vaguely reminiscent of a tug-of-war – there's a palpable sense of dynamism in this model. Yet the grace with which the frames carry the table tops so elegantly still comes as a surprise.

Honoured for its design quality at the German Design Council's competition "**interior innovation award 2015**". And nominated for the **German Design Award 2016**.

info@belfakto.com _ www.belfakto.com

ARANEA

Dynamic. With its spectacular frame this solid wood table draws attention to itself. The legs, poised as if to jump, give the table sculpture unseen dynamism. It awakes almost animal associations, and the fact that it is called Aranea – the spider – is no coincidence. It nonetheless has an elegant, formally extremely self-contained, and balanced look about it. A natural appearance

Nominated for the **German Design Award 2016.**

info@belfakto.com _ www.belfakto.com

TRIOLA

The triad. Starting from a symmetrical basic this solid wood table draws its strength from the harmonious triad formed by the frames. Like dancers performing ballet the three elements are joined in an elegantly composed “pas-de-trois”. A classic look, which stands out for details such as the filigree slit between the parts of the frame and the high quality of the craftsmanship in the transitions. Also extremely prestigious with just one intersecting frame, with a circular or square top.

Honoured by the German Design Council with the **German Design Award 2016**.

info@belfakto.com _ www.belfakto.com

VIVIAN

Refined. A graceful table featuring an elegant slim top and a playfully light solid wood frame, reminiscent of a ballerina dancing en pointe. Despite its lightness, the structure is balanced and robust. The slender legs and spacious amount of foot room ensure that sitting at it is comfortable.

The fitted trim makes it easy to produce as an extending table that stays 'in shape' at all times. Original benches and highboards respond to the individual vocabulary of the frames and can either be combined to create a coherent ensemble or can stand alone.
